

FOR IMMEDIATE RELEASE

**Epoch Design to Showcase the New Mail Boss™ Package Master Locking Mailbox at Fall True Value Market, Booth #4866, October 2-4, 2009**

REDMOND, Washington (September 30, 2009) — Epoch Design, LLC, manufacturer of the Mail Boss™ locking security mailbox and innovative provider of USPS approved security mailboxes in the U.S., will be introducing their new high security locking mailbox product line at Booth #4866 at the 2009 Fall True Value Show in Salt Lake City, Utah.

To satisfy growing customer demands, Epoch Design has created the new MAIL BOSS™ Package Master™ locking security mailbox, the only standard-sized 'bin-mailer' that can accept packages and still securely store mail without being vulnerable to fishing.

"After the successful introduction of our Mail Boss high security curbside mailbox, we were flooded with requests for a product that could accept larger parcels and packages but with the same exceptional security features as the original Mail Boss. We soon learned that not a single product was available in the marketplace that would give homeowners true mail security for 'bin-mailer' mailboxes," said David Bolles, President of Epoch Design.

The MAIL BOSS™ Package Master™ offers a high security choice for consumers who need to be able to receive parcels and packages. Other package or 'bin' mailers offer little to no mail security, because the same opening which allows for package delivery also allows for fishing, leaving homeowners vulnerable to the nightmare of mail identity theft.

The Package Master™ features an innovative trap door design with patent-pending "Mail Shield" technology. The Mail Shield operates via a lever mechanism that allows for package delivery while engaging an innovative steel barrier which guards the mail and package storage area from access by prying criminal hands.

The Package Master™ touts the same high security features as the Mail Boss™ curbside model. Made of 12- and 14-gauge electro-galvanized powder-coated steel, the Package Master™ also features the patented anti-pry door locking system with a brass core tube lock to foil even the most determined identity thieves.

In addition to introducing the Package Master™ locking mailbox, Epoch Design will be offering True Value members promotional pricing on end-cap displays with 40% merchandise discounts and free point-of-purchase LCD players.

Mail Boss™ products by Epoch Design will be on display at Booth #4866 at the Salt Palace Convention Center in Salt Lake City, Utah. For more information on Epoch Design, LLC and the MAIL BOSS™, please call (800) 589-7990 or visit [www.MailBoss.net](http://www.MailBoss.net) online.
